

Anode (+)

Conductive Layer

Emissive Layer

Cathode (-)

→ Light

A diagram of a light-emitting diode (LED) structure. It consists of four horizontal layers. The top layer is white and labeled 'Anode (+)'. The second layer is light blue and labeled 'Conductive Layer'. The third layer is light green and labeled 'Emissive Layer'. The bottom layer is light gray and labeled 'Cathode (-)'. An orange arrow originates from the center of the 'Emissive Layer' and points to the right, ending at the word 'Light' in orange text.
